Our parental involvement initiatives have created a partnership that strengthens the foundation of our students' growth. Through regular parent-teacher interactions, workshops, and open communication, we continue to cultivate a culture of trust and collaboration.

8. I Quote - ARISTOTLE “WE ARE WHAT WE REPEATEDLY DO; EXCELLENCE, THEREFORE, IS NOT AN ACT BUT A HABIT” unquote.

By promoting active participation through family engagement, health education, and a variety of enriching activities, it establishes a safe and supportive space for all. With the constant encouragement of our parents, we remain committed to guiding our students with empathy, fostering growth, and ensuring holistic development across all aspects of learning.

Announcing with pride, we have secured 100% results for the academic year 2024-25 in the AISSE examinations. Science & Social Tooper - Moosa Wajid Khan

Information Technology – Rakesh Raghunath Gharge, Syed Hamdanulla A & Hamsini V

Your dedication and achievement are your success. Well done on this accomplishment.

All Efforts made in the field of environment Education:

Environmental education in schools transforms students from passive learners into active stewards of the planet. By integrating hands-on activities, schools foster a deep-rooted respect for nature and sustainable living.

Key Initiatives and Activities

Eco Clubs: These student-led forums empower youth to lead green initiatives. Activities often include managing school waste, maintaining herb gardens, and conducting energy-saving audits. They serve as a bridge between classroom theory and real-world conservation.

World Environment Day: Celebrated on June 5th, this serves as a massive awareness platform. Schools organize rallies, "Best from Waste" exhibitions, and seminars to sensitize the community about pressing ecological issues.

Collage Making: This creative activity uses recycled materials or items found in nature (fallen leaves, twigs) to depict environmental themes. It encourages students to visualize the beauty of biodiversity and the impact of pollution, blending art with advocacy.

Seed Bombs: A fun, "guerrilla gardening" technique where seeds are encased in a mixture of clay and compost. Students toss these "bombs" into barren areas; when it rains, the clay breaks down, and the seeds germinate. This teaches them about reforestation and seed dispersal in a tangible way.
